

Devil Goat Farm is committed to breeding only the healthiest dogs with the best temperaments possible. Our dogs are raised from birth with exposure to goats, poultry and humans of all ages.

We ask you to complete the following questionnaire in order to match you to the right dog and make sure that everyone involved has a thorough understand of each others' expectations.

Maremma Sheepdogs are not appropriate in every situation, and it is vitally important to us that our dogs be placed in an environment where they will not only succeed, but will also thrive and live happy lives. Please provide as much information as you can to help us understand the environment in which you wish to raise your Maremma puppy.

ANY OTHER COMMENTS?

Our puppies are sold with every expectation that they will pass OFA hip, elbow and eye certification based on their parents' health histories. However it is always possible, even in the best lines, for offspring to have an issue crop up. Proper feeding and appropriate amounts of exercise and veterinary care are essential. Currently the MSCA offers a rebate toward hip certification and we strongly encourage all customers to have their dogs hips certified even when they are not intended as breeding animals.

We ask that you have a veterinarian examine your puppy within 5 days of purchase to certify that they are healthy upon arrival. We guarantee that we are selling you an animal that is in good health and with a limited registration pedigree application. Details of our health and sales guarantee will be contained in our purchase contract and no purchase agreement is being made with this questionnaire. In our contract we also state that we will take back the puppy/dog should your circumstances eventually change. We want nothing but long, happy, productive lives from any puppy born on our farm.
